SUBJECT:

FY 2004 IHS and Tribal Hospitals Inpatient Statistics and Comparison with FY 2003

During FY 2004, inpatient workload measures at IHS hospitals rose slightly compared to the prior year, FY 2003. Admissions and discharges both increased by 1.1 percent, whereas births increased by 1.7 percent. The number of beds in these facilities declined slightly (14 beds, or 1.2 percent) due to a reduction in the number of beds to fifteen in Winnebago Hospital, a consequence of the closing of its alcohol/substance abuse unit. The average daily patient load (ADPL) as well as adult hospital days declined by 3.6 percent at IHS Hospitals. The average length of stay (ALOS) also decreased 5.4 percent in IHS Hospitals.

Inpatient workload measures, admissions and discharges, increased during the same time period at tribally operated hospitals. The number of admissions rose 6.7 percent in FY 2004, whereas discharges increased 6.9 percent during the same time period. The number of births also increased 9.2 percent. The number of beds in tribally operated hospitals decreased 1.2 percent from 591 to 584. The reduction of seven beds occurred at the Cherokee Hospital, a fact confirmed by management reporting from the facility. The ADPL increased by 2.4 percent for this year, and the number of adult hospital days increased 2.6 percent in the same period. In the tribally operated hospitals, the ALOS declined 2.3 percent.
